

Now... UPS as a Service!

Reserve cash to grow your business.

Managing dispersed UPS systems can be challenging for you and your customers. With Monitoring & Dispatch Services, you can effortlessly provide a new or complementary managed service to your customers, without the hassle.

Bundle select APC Smart-UPS, a three- or five-year Monitoring & Dispatch Service plan, and a network management card, and be among the first to offer dispatch as well as monitoring services.

The Power of APC + Ingram Micro

APC and Ingram Micro allow you to combine hardware and services into a single solution for your customers.

You get cash flow relief with up-front, in-full payments. Your customer gets a simple monthly bill.

80% of companies see demand from their customers for technology services.*

Monitoring & Dispatch Services

Features	Benefits
 Cloud-based, remote monitoring managed by APC via EcoStruxure™ Asset Advisor (included)	Minimize business interruptions with 24/7 monitoring and event notification help
 24/7 technical support	Access remote troubleshooting via technical expert engineers
 Remedial replacement of parts and batteries	Reduce time to repair with proactive shipment of replacement parts
 Monthly risk mitigation reporting	Proactively manage customers' risk with reporting on device age, incidents, and proactive maintenance recommendations
 Next business day, on-site service	Replacement of necessary parts or units by Field Service Representative at customer site regardless of UPS age or location

Life Is On

Why you'll like UPS as a Service...

Get paid up front to reduce liability

Improved cash flow + up-front margin

Simple, predictable UPS refresh cycles

Why customers will like UPS as a Service...

Payment plan rather than up-front equipment costs

Predictable budget and cash flow

Keeps UPS systems updated

How it works:

- » Purchase Smart-UPS plus Monitoring & Dispatch Service with a finance agreement.*
- » Deploy the technology to customer environments or co-location facilities.
- » Receive up-front, in-full payment from Ingram Micro.
- » Your customer gets a simple monthly bill.

Why add a distributed IT management service?

Gain Visibility

Stay in control with centralized visibility, while we monitor your customers' dispersed UPS systems.

Avoid Costly Dispatches

Avoid the operational cost to reach your customers' dispersed IT installations with our vehicles.

Increase Revenue

Extend your reach beyond point products, without the worry and effort.
