Date	Time (ET)	Type	Topic	Description
Wednesday, December 3	1 p.m.	AI	**Cisco Expanded: Accelerate AI adoption.**	Accelerate AI adoption by combining two of the most utilized networking and compute portfolios. Cisco and NVIDIA provide unmatched flexibility and choice, eliminating barriers to AI data center investments.
Thursday, December 4	1 p.m.	Collaboration	**Cisco Expanded: The collaboration cross-sell story.**	So, you sell collaboration? Learn about complementary Cisco products to round out your collaboration offer and complete your rooms, including the latest switches and Wi-Fi technologies. We'll also cover Cisco's November announcements.
Tuesday, December 9	1 p.m.	All	**Cisco Expanded: Countdown to Cisco 360**	We're less than two months out from Cisco's release of the all-new Cisco 360 Partner Program. Go deep into everything Cisco 360—from maximizing your rebates to new requirements for the Foundational category metrics. Join us and get things wrapped up for the holidays.
Wednesday, December 10	1 p.m.	Security	**Cisco Expanded: Cisco XDR benefits.**	The power of Cisco XDR. We'll discuss benefits, such as faster detection, improved response, enhanced security posture and operational efficiency, reflecting Cisco XDR's capabilities to streamline investigations, prioritize threats and strengthen security resilience.
Thursday, December 11	1 p.m.	Networking	**Cisco Expanded: The user experience network.**	Building on the modernized network foundation, we'll explore how Cisco enhances the user experience. We'll also showcase Cisco Spaces integration with Wireless, Physical Security and Collaboration to bring these separate platforms together.

Monday, January 6	**1 p.m.**		**Cisco Expanded: Collab Cisco 360 launch information.**	Join us for the latest information on all things Cisco Collaboration and the C360 Program. We'll show you how to improve your score and how to use the new mock audit for Powered Services.
Tuesday, January 14	**1 p.m.**		**Cisco Expanded: AI-ready Hybrid Mesh Firewall.**	Learn how to protect your network, multi-cloud environments, workloads and AI with Cisco's Hybrid Mesh Firewall. Centralized cloud orchestration enhanced by AI for simplified policy administration and system configuration.
Wednesday, January 15	**1 p.m.**		**Cisco Expanded: AI-ready networks.**	AI is the next frontier for our Future Proofed Workspaces. AI is integrated through Cisco Cloud dashboards, ThousandEyes, collaboration and security platforms. All combined, they're aligned through the new Cisco AI Canvas. Join us as we showcase these AI benefits, leading to new refresh opportunities.
Wednesday, January 22	**1 p.m.**		**Cisco Expanded: AI Ready Edge and Operations.**	AI-ready edge. Unified operations. Fused security. This is more than a server. Discover the system that brings the power of the data center to the edge—and the edge to AI—by unifying compute, networking, storage and security where inference and agentic workflows occur.
