CYBERSECURITY POSTURE ASSESSMENTS

## What you don't protect, they lose.

Think your customers are secure? You might need to think again.

Cyber threats evolve constantly. Luckily, our team works directly with your leadership and IT teams to take a close look at your customers' current security practices, using the CIS 20 **Critical Security Controls**—the industry's gold standard.

The result? You get a clear picture of where your customers stand today and practical steps to make their defenses stronger for tomorrow.

### What we assess

We take a close look at key security areas, such as:

- Device and software inventory
- Wireless access controls
- Data recovery capabilities
- Boundary defense
- Penetration testing and red team exercises
- Plus 15 additional CIS controls

### Our process

- 1) Discovery: Interview with IT stakeholders to understand current security environment and priorities.
- 2) Assessment: Review of current practices vs. CIS Critical Security Controls.
- 3) Analysis: Identify risks, gaps and opportunities for improvement.
- 4) Reporting: Documented findings and personalized recommendations.
- 5) Presentation: Final report delivered to your team and customer.

### What you'll get

At the end of the assessment, you'll receive:

- A detailed report: Findings mapped to the CIS 20 Controls, with clear recommendations.
- Actionable guidance: Expert insights to reduce risks and improve posture.
- Executive presentation: A summary designed to engage stakeholders and decision-makers.

### Ingram Micro by your side

Ingram Micro's Cybersecurity Posture Assessments are led by highly skilled security architects with deep expertise across diverse industries and threat environments. Our team brings both technical precision and strategic insight, ensuring risks are not only identified but also prioritized in ways that align with your or your client's articulated business goals.

We'll help you uncover risks for your customers while positioning you as a trusted advisor.

And because we operate as a neutral third party—not tied to any specific cybersecurity brand—our recommendations are always objective, ensuring your clients receive guidance focused solely on strengthening their defenses.

### Why it all matters

The Cybersecurity Posture Assessment isn't just a checklist—it's a conversation that helps you see the big picture. By knowing where your customers' security stands, you can make smarter decisions, help close gaps and strengthen their defenses against today's constantly changing threats.

#### Did you know?

*Organizations that conduct regular security assessments reduce their risk of a major breach by up to 45% compared to those that don't. Help your customers uncover exploitable vulnerabilities that could otherwise lead to costly downtime, data loss or compliance penalties.*
