NETWORK PENETRATION ASSESSMENTS

Help customers find vulnerabilities before attackers do.

Want to help your customers stay safer and help yourself stand out in a crowded market?

Network penetration testing makes it possible.

With Ingram Micro's Network Penetration Assessments, you can add a high-demand cybersecurity service to your portfolio without adding complexity. It's easy to deliver, easy to position and built to create long-term value—for you and your customers.

What's in it for you?

- Easily add a top-demand security service to your toolkit (no extra headache)
- Get more repeat business—customers come back when they see real value
- Open doors to new hardware, software and managed services sales
- Increase your credibility with clear, third-party validation for your cybersecurity recommendations

Why your customers will thank you for it.

- Identify vulnerabilities before attackers do
- Support key compliance requirements for PCI, HIPAA, SOX, NYDFS and more
- Receive a clear, actionable report—not pages of technical noise
- Gain confidence knowing their environment has been truly tested

How it works:

- 1) We collaborate with you and your customer to define exactly what needs to be tested
- 2) Certified experts simulate real-world attacks using both automated tools and hands-on techniques
- 3) You receive a straightforward report that clearly shows what's secure—and what needs attention

Got questions? We've got answers.

Network Penetration Assessments

SKU	Description	MSRP
JR8181	External Penetration Test (1st IP)	\$2,975.00
JR8182	Internal Penetration Test (1st IP)*	\$2,494.00
JR8183	Each Additional IP (External or Internal)	\$619.00

*Internal tests will require the installation of a scanning device on your customer's network.

Why it all matters.

Even the smallest, overlooked gaps can become an open door for attackers. Penetration testing shows you exactly how those weaknesses could be exploited—before someone else does.

With Ingram Micro, you get:

- Certified security experts who think like attackers and test like defenders
- Real-world results based on proven frameworks, tools, and hands-on techniques
- Clear, prioritized remediation guidance you can act on immediately
- Support that scales—from testing and validation to remediation and ongoing managed services

Protecting your customers' networks starts by seeing their systems the way attackers do. Ingram Micro helps you uncover the real risks—so you can close them with confidence.
