FIREWALL RULE AUDIT ASSESSMENTS

How to: Keep the bad out and the good protected.

Your customers rely on firewalls to keep threats out—but even the best defenses can slip if rules are outdated or misconfigured. The SANS Institute calls for regular firewall reviews as a critical security control. With Ingram Micro's **Firewall Rule Audit Assessment**, you can help your customers stay protected, compliant and ready for whatever comes next.

What we assess

Our certified security auditors use a mix of manual reviews and automated testing to evaluate your customers' firewalls across four key areas:

- Rule sets and configurations: Are they up to industry standards?
- Potential weaknesses: Could attackers exploit them?
- Compliance: Do they align with SysAdmin Audit Network Security guidelines?
- Baselines and policies: How do settings compare to approved standards?

What you'll get

Regular firewall audits help your customers stay secure and efficient. With our assessment, you can help them:

- Remove outdated rules that leave doors open to threats.
- Optimize rule order for better firewall performance.
- Catch misconfigurations before they become problems.
- Fix grouping or hierarchy issues that slow things down.

We assess firewalls from Cisco, Extreme Networks, Fortinet, Palo Alto Networks, Juniper Networks, WatchGuard and Dell SonicWALL.

Got questions? We've got answers.

Reach out to the Ingram Micro Services team for help with service registration, quotes, product info or custom statements of work: usservices@ingrammicro.com or (800) 456-8000, ext. 76094

Post-assessment

After the assessment, you'll receive a comprehensive Firewall Rule Evaluation Report that makes it easy for you to show:

- Expert analysis of your customers' current firewall configuration
- Prioritized findings ranked by severity: Critical, High, Medium, Low, Informational
- Tailored remediation plans to address vulnerabilities and strengthen defenses

This report gives you a clear roadmap to help your customers improve security while positioning your services as trusted, proactive and essential.

Firewall Rule Audit Assessment

SKU	Description	MSRP
SF4759	First Firewall	\$960.00
SF4760	Each Additional Firewall	\$4,480.00

All services shall be offered and sold subject to Ingram Micro's Professional Services Terms.

Why it all matters

With decades of cybersecurity expertise and a global network of certified security professionals, Ingram Micro goes beyond surface-level scans. Our team combines human insight with advanced assessment tools to reveal what automated reports alone can't.

The result?

Actionable guidance, detailed remediation plans and confidence that your customers' firewalls are performing at their best, helping you deliver real value and peace of mind.
