Dell Pro Desktops and All-in-Ones
Built for professional-grade performance

- 30+ years of customer-led innovation

- Performance for productivity with AI PC options, powered by Intel® Core™ Ultra (Series 2) or AMD Ryzen™ 7 8700 / 5 8600 series desktop processors

- Simplify IT with a single BIOS across Pro Micro/Slim/Tower and Pro All-in-One within each silicon vendor

- Unmatched security - Dell offers off-host BIOS and firmware verification

- Sustainably designed with up to 50% recycled steel in the chassis of Dell Pro desktops / up to 50% post-consumer recycled plastic in the chassis of Dell Pro All-in-Ones*

- EPEAT Climate+, ENERGY STAR, TCO certifications

- Reliably built with less 1% that experience a first-year service event**

- Breadth of ecosystem and mounting options

** Source: Based on Dell Quality Intelligence (Qi) tool - Dell Internal Analysis, January 2025. When quantifying the past 4 fiscal years of data, we find fewer than 1% of OptiPlex desktops experience a first-year quality incident (or dispatch), while reporting continuous quality improvements year over year. Further, the YTD FY25 data (99.47%) is trending to the 99% or better by year-end, as of Jan, 2025.

How Dell wins over HP & Lenovo

Reliability

- <1% of Dell Pro desktops experience a first-year service event

Sustainability
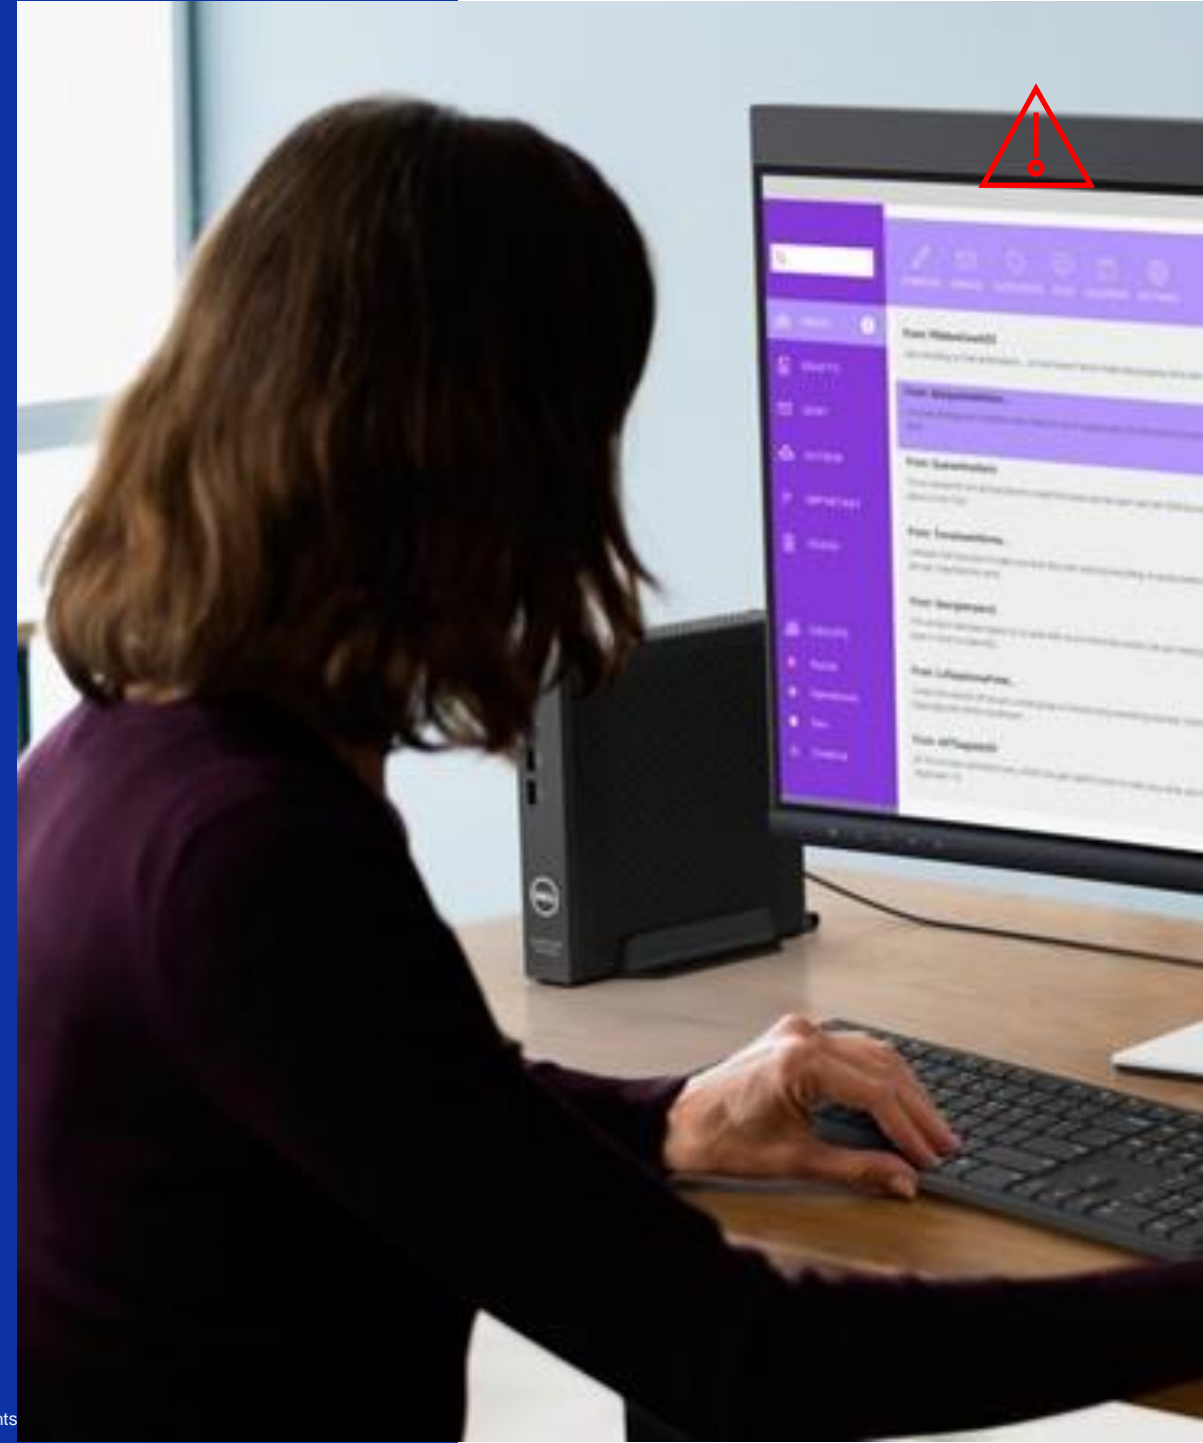

- Dell Pro Micro is the most energy efficient ultracompact commercial desktop, based on yearly energy consumption*
- Dell was the first to include 50% recycled steel in the chassis of commercial Micro, Slim and Towers desktops

Simplified IT

- Dell delivers a single BIOS across form factors and CPUs within each silicon vendor for simple image management and deployment. With Lenovo and HP, IT must deal with separate images for N-gen vs. N-1 CPUs. Just one image for Dell.
