# Dell Technologies Advantage

One-stop-shop AND best-of-breed

## Modern Workplace

- World's smallest,<sup>1</sup> thinnest, most powerful commercial AI PCs<sup>2</sup>
- World's #1 monitors<sup>3</sup>
- Most manageable and secure commercial PCs<sup>4</sup>
- Leading in use of sustainable materials

## Modern Data Center & Multicloud

- #1 servers<sup>5</sup>
- #1 external storage<sup>6</sup>
- #1 storage software<sup>7</sup>
- #1 Purpose-Built Backup Appliances<sup>8</sup>

## Artificial Intelligence

- The world's broadest AI solutions<sup>9</sup>
- Open ecosystem that continues to grow with proven, validated solutions
- World's best management consulting firms – Forbes 2024

## Security / Resilience

Industries most secure supply chain

## Sustainability

An industry leader in sustainable materials and packaging

# Advance priority initiatives by modernizing the data center

EDGE

CORE

CLOUD

Accelerate  
AI adoption

Modernize  
application  
platform

Optimize  
multicloud  
& edge

Improve  
data center  
efficiency

Strengthen  
cyber  
resilience

**Dell Infrastructure Solutions**

**&**

**Multi-Cloud Portfolio**

# Problems facing IT departments

- Performance & Capacity: 
  - Individual applications that may require extremely high performance or high capacity, and sometimes both
  - Hosts becoming laden with virtual machines, each VM may become increasingly storage-I/O bound
- Storage Consolidation: 
  - Data center consolidation is often the primary goal when selecting a storage platform
    - The secondary issue becomes scaling, and pace of change, causing performance and capacity issues
- Reliability: 

Data loss is just as critical to the medium-sized data center as it is to the large enterprise, maybe even more so

Medium sized IT departments are the most dependent on their storage systems
- Serviceability: 

Similar to reliability, serviceability can again be more important in the mission critical data center

  - Smaller IT support staff require more “self-service” capabilities within the storage array
- Security: 
  - Security has become one of the most important considerations in the mission critical data center

# IT is facing disruption & opportunity everywhere

AI explosion

81%

report that AI and generative AI will significantly transform their industry.<sup>1</sup>

Data growth & usage

21%

compound annual growth rate (CAGR) of data over five years to reach **221,000+** exabytes by 2026.<sup>2</sup>

Multicloud strategy

91%

face challenges building a multicloud strategy to support innovation.<sup>1</sup>

Rising energy consumption

200%

increased data center power consumption by 2030.<sup>3</sup>

Evolving threat landscape

83%

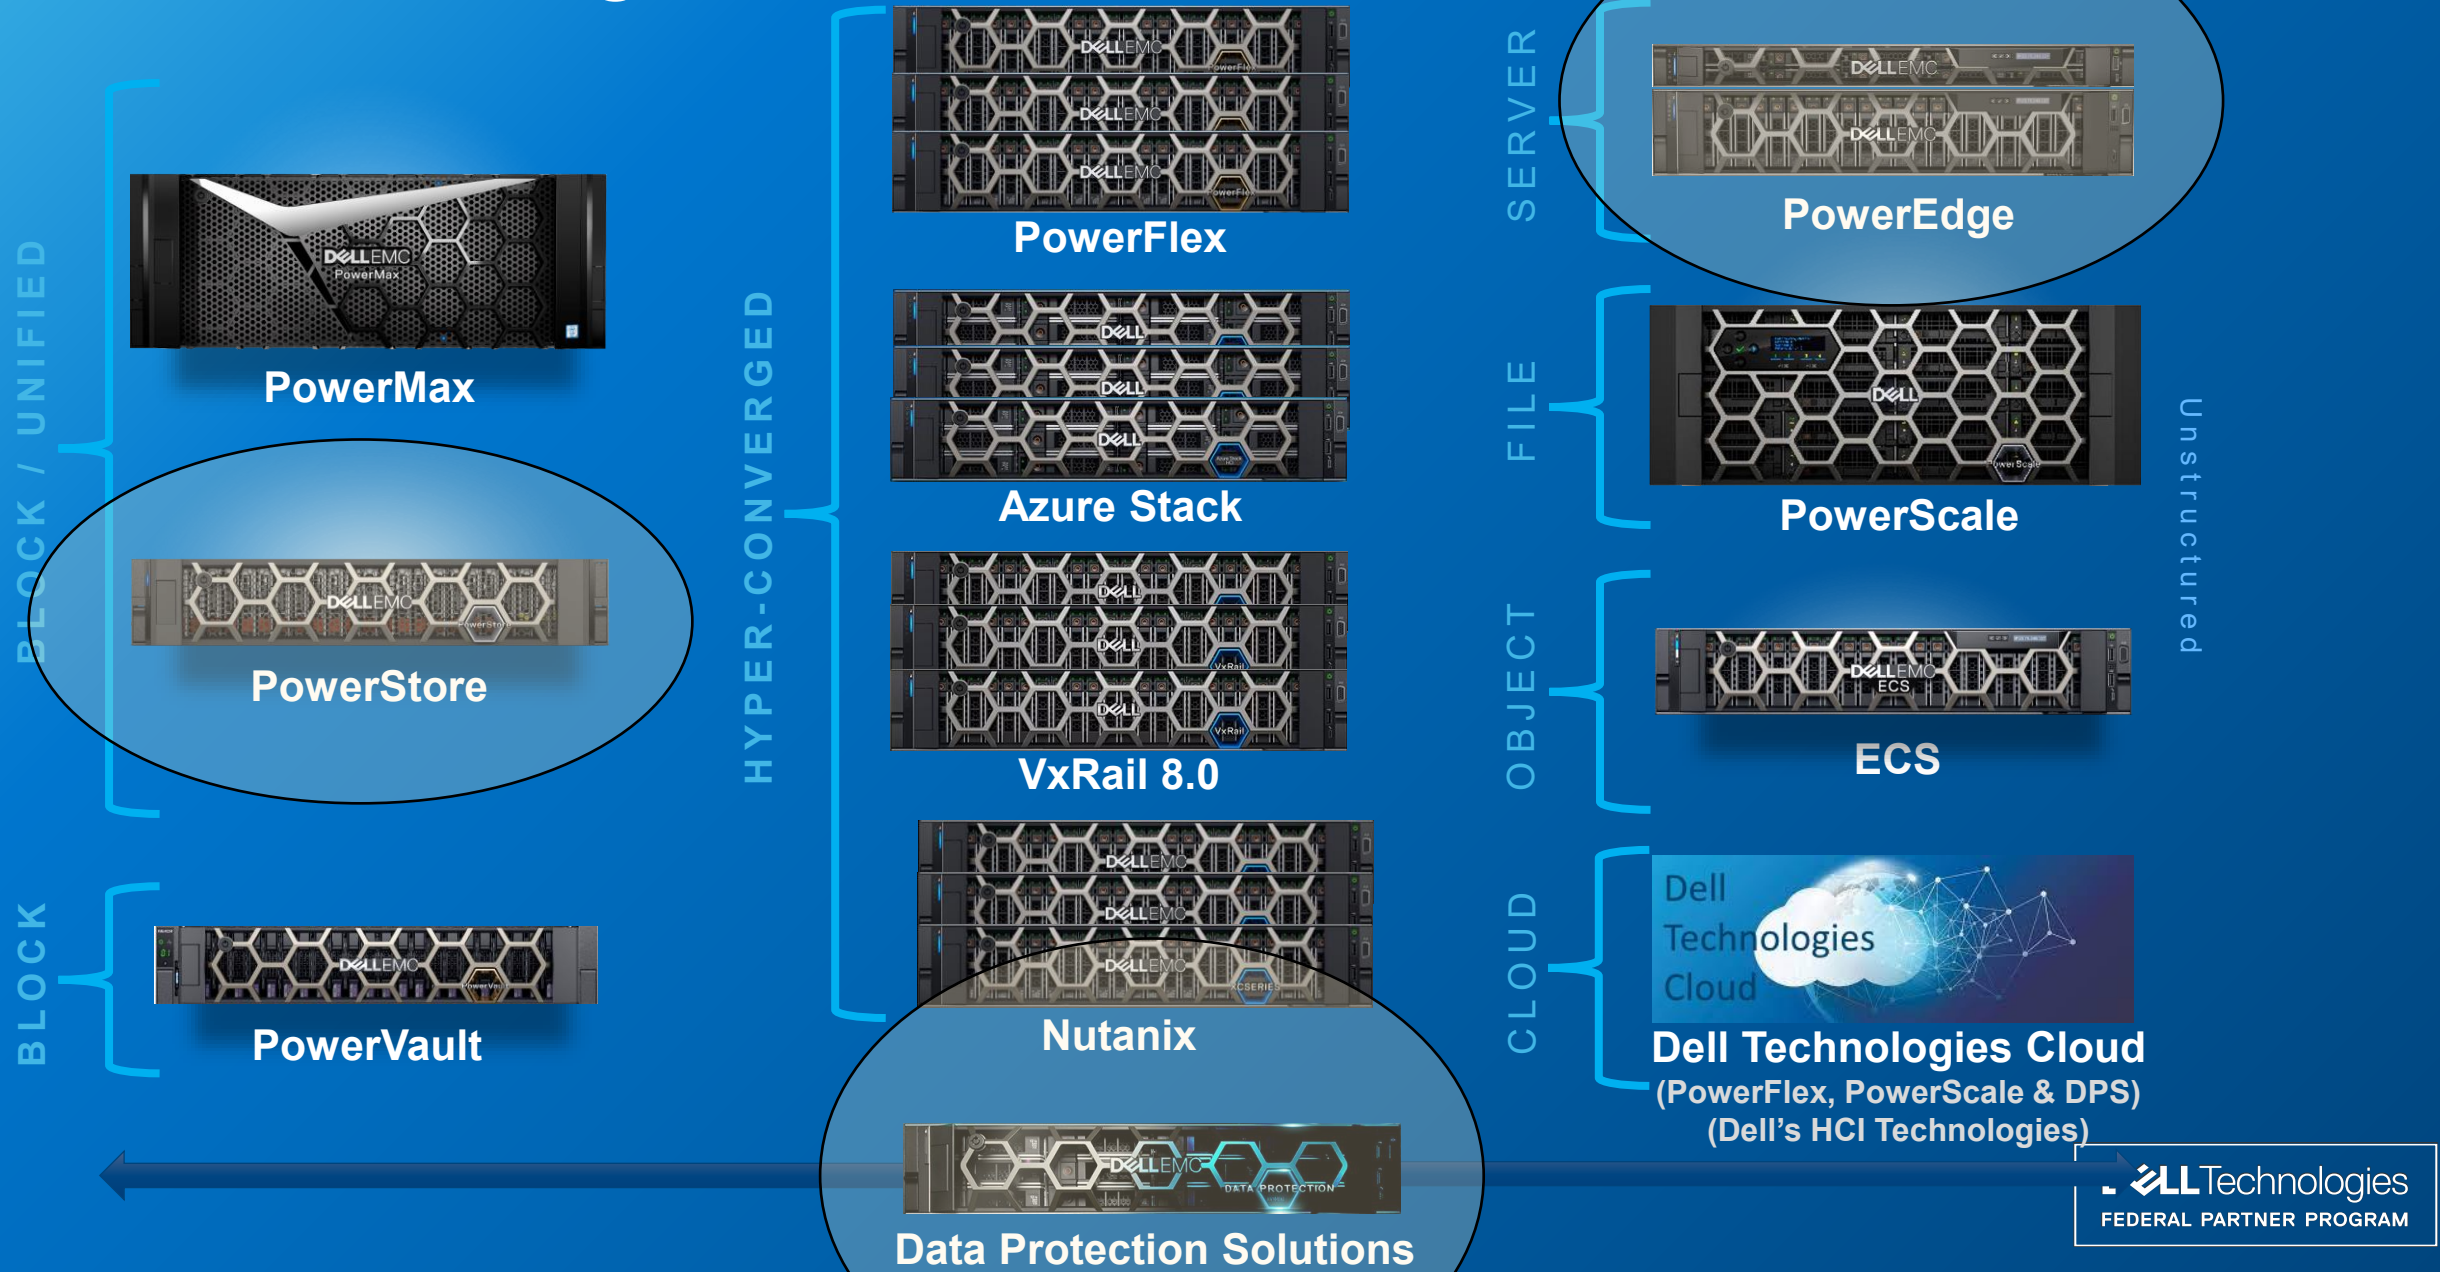

have been impacted by a security attack in the past 12 months.<sup>1</sup>

1. Innovation Catalysts, Dell Technologies, February 2024

2. IDC WW Global DataSphere and Global StorageSphere Structured and Unstructured Data Forecast, 2022-2026

3. McKinsey & Company, Investing in the rising data center economy, January 2023 (US-based analysis)

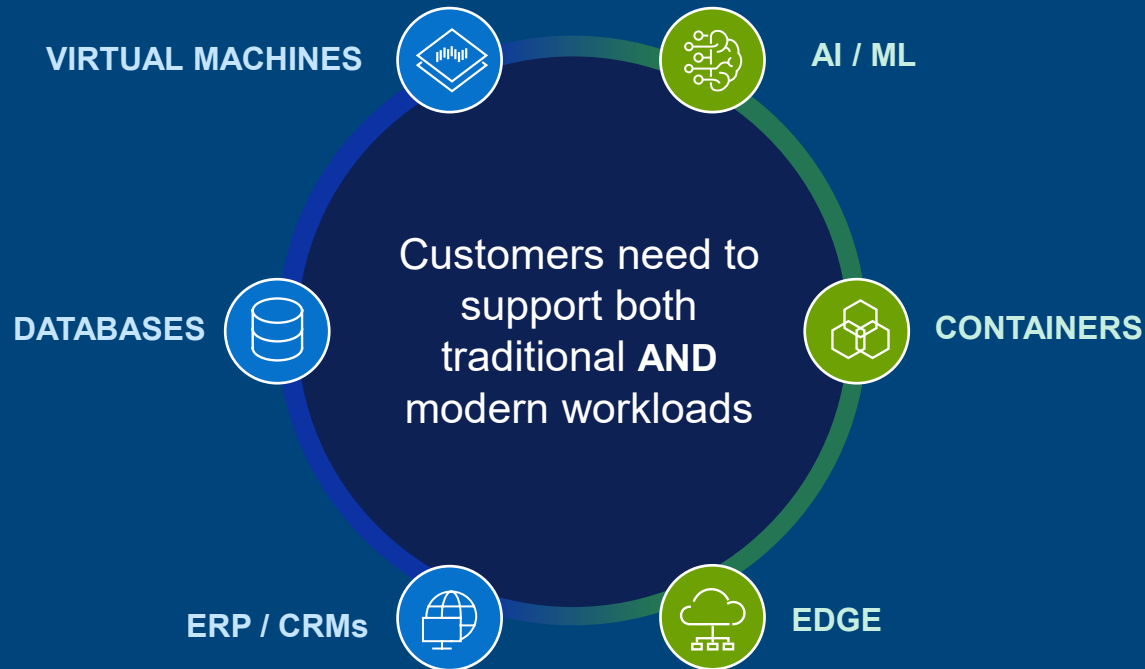

# Dell Technologies – Multi Cloud Portfolio

# Customer workload mix is evolving at a rapid pace

Evolving workload mix...

TRADITIONAL and MODERN

... leading to evolving mission needs

Avoid vendor lock-in

Support for VM, Containers, and Bare Metal

Efficient resource utilization

Consistent, shared data layer

Independent resource scaling to dynamically match needs of each workload

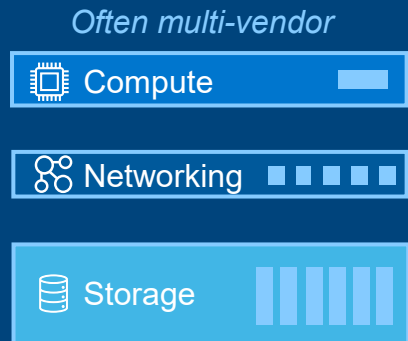

# Evolving workload mix requires disaggregated infrastructure

3-Tier

Open, but complex

Hyperconverged

Simple, but closed

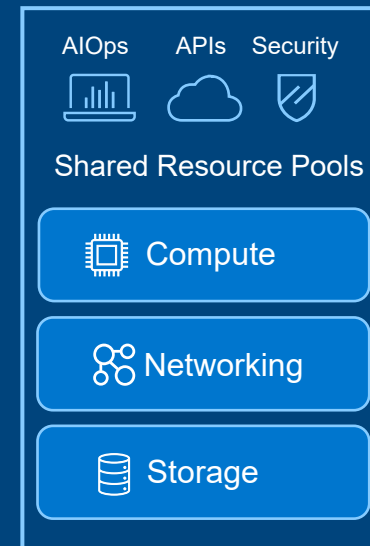

*Locked into one vendor*

Disaggregated

Open, simple, and flexible

*Interoperable ecosystem with consistent management and operations*

# HCI may **NOT** be optimal for evolving customer needs

## Hyperconverged

Interlocked Hypervisor,  
Compute, Networking & Storage

- ✗ Locked into a single ecosystem
- ✗ Not optimal for AI
- ✗ More servers required to scale
- ✗ Higher SW licensing costs

- ✗ More network ports required

- ✗ Low storage utilization
- ✗ Higher storage \$/GB
- ✗ Lower storage availability
- ✗ Creates more silos

< 20%

Average **CPU**  
Utilization\*

< 35%

Average **RAM**  
Utilization\*

< 45%

Average **Storage**  
Utilization\*

\*based on 9,095 HCI Clusters dialing home to Dell

# Disaggregated infrastructure is the **right choice** for customers

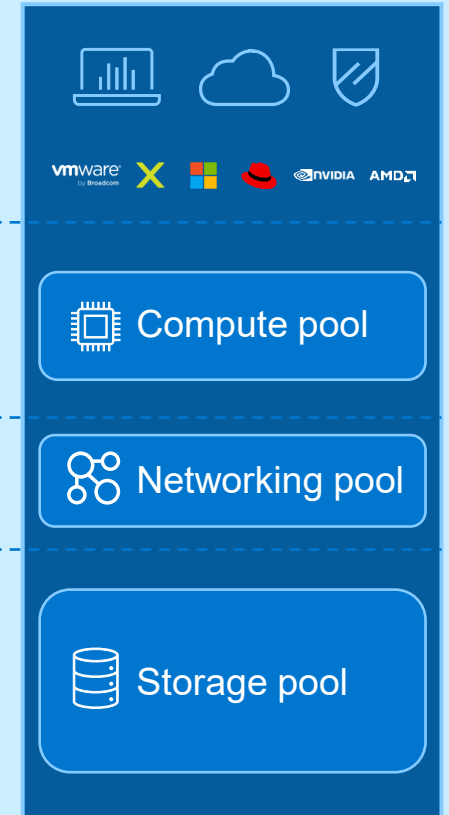

## Disaggregated

Open, Simple and Flexible  
Compute, Networking and Storage

- ✓ No vendor lock-in
- ✓ Fewer servers required
- ✓ Lower SW licensing costs

- ✓ Fewer network ports

- ✓ Higher utilization
- ✓ Lower \$/GB with 5:1 DRR
- ✓ Better storage availability, easier patching and LCM
- ✓ Reduces siloed stacks

Up  
to

32%

Lower cost than  
hyperconverged  
infrastructure<sup>1</sup>

<sup>1</sup>Dell internal analysis – calculations based on comparisons between vSAN Ready Nodes (HCI) and PowerEdge + PowerStore

# Benefits of disaggregated infrastructure

Open and Flexible Compute, Networking and Storage

- ✓ Open ecosystem
- ✓ Fewer servers required
- ✓ Lower SW licensing costs

- ✓ Fewer network ports

- ✓ Higher utilization
- ✓ Easier patching and LCM
- ✓ Lower \$/GB
- ✓ Better storage availability
- ✓ Reduces siloed stacks

Product / technology advantages

Power ANY innovation

Stretch your IT budget

Activate your MULTICLOUD future

# PowerStore gives your customer everything they need to succeed

More Performance	More Efficiency	More Resiliency	More Multicloud
<p>Headroom for current and future needs</p> <p><b>30% software-based performance boost<sup>1</sup></b></p> <p>66% hardware-based boost <i>(Gen 2 higher model DIP upgrades)</i></p> <p>2X more volumes / hosts<sup>3</sup></p> <p>8X more VLANs<sup>4</sup></p>	<p>Accomplish more with every investment</p> <p><b>Industry's most flexible QLC offering<sup>5</sup></b></p> <p>20% improved data reduction<sup>7</sup></p> <p>28% more TBe/watt</p> <p>QoS, capacity accounting, universal import, more...</p>	<p>Protect any workload with ZERO data loss</p> <p><b>Metro Volume for Windows, Linux, VMware</b> <i>(Zero RTO/RPO + Witness)</i></p> <p>Native synchronous replication for file/block</p> <p>Up 3x more snapshots<sup>8</sup></p>	<p>Now backup, restore and migrate to cloud</p> <p>Migrate live data between PowerStore and <b>APEX Block Storage</b> for Public Cloud</p> <p>Storage Direct backup/recovery to <b>APEX Protection Storage</b></p>

 **APEX AI Ops – now with GenAI advantage**

+ New Future-Proof advantages

 **5:1 DRR Guarantee**

 **APEX subscriptions**

 **Lifecycle Extension with ProSupport**

1 – Based on internal analysis comparing PowerStore 5200 peak IOPS with PowerStore OS 3.6 vs. PowerStoreOS 4.0, running 70/30 read/write mix, 128k block size over FC. Actual results will vary.

2 – Based on internal analysis comparing PowerStore 3200 vs. PowerStore 5200 running PowerStoreOS 4.0 peak IOPS running 70/30 read/write mix, 8k block size over FC. Actual results will vary.

3 – Maximum supported hosts volumes for PowerStore models 1200 through 9200 with PowerStoreOS 3.6 vs. PowerStore OS 4.0.

4 – Maximum supported VLANs for PowerStore models with PowerStoreOS 4.0 vs. PowerStoreOS 3.6.

5 – Disclosure TBD

6 – Based on internal testing comparing PowerStore 3200Q vs PowerStore 3200T for 8k 70/30 workloads.

7 – Based on internal analysis comparing data reduction with PowerStoreOS 3.5 vs. PowerStoreOS 4.0 with variable block compression, Actual results will vary.

8 – Maximum supported block snapshots for PowerStore model 9200 with PowerStoreOS 3.6 vs. PowerStore OS 4.0.

# Future-proof and optimize your customer's investment

## 5:1 DRR Guarantee

### Industry's best data reduction guarantee

- Highest guaranteed DRR without preassessment
- No program fees
- Longest coverage term
- Transparent remediation

## APEX Subscriptions

### Subscribe to PowerStore with greater convenience

- Pay for only what you use each month
- Tailor capabilities to meet needs on your schedule
- On-prem and off-site managed services options

Plus...

## Existing Future-Proof offers

### Lower risk, improve ROI

- **3-year Satisfaction**
- **All-inclusive Software**
- **Never-worry Data Migration**
- **Tech Refresh & Recycle**
- More...

## Lifecycle Extension with ProSupport

### Simplest way to stay continuously modern

- New comprehensive ProSupport offer combines
  - ✓ World-class support
  - ✓ Technology upgrades
  - ✓ Capacity trade-ins
  - ✓ Modernization consultations
  - ✓ Other membership benefits

*Successor to Anytime Upgrades*

Simplify IT operations

So your customer can focus on mission outcomes

# PowerStore

Data-centric

Intelligent

Adaptable

## Designed for the Data Era

### Any Workload

Physical and virtual Apps and DBs, Containers and File

### Performance Optimized

Scale up and scale out with end-to-end NVMe\*

### Efficiency Without Compromise

Always-on inline data reduction

### Programmable Infrastructure

Streamlines development and automates workflows

### Autonomous Appliance

Built-in automation and ML optimizes system resources

### Flexible Architecture

Enables speed and application mobility

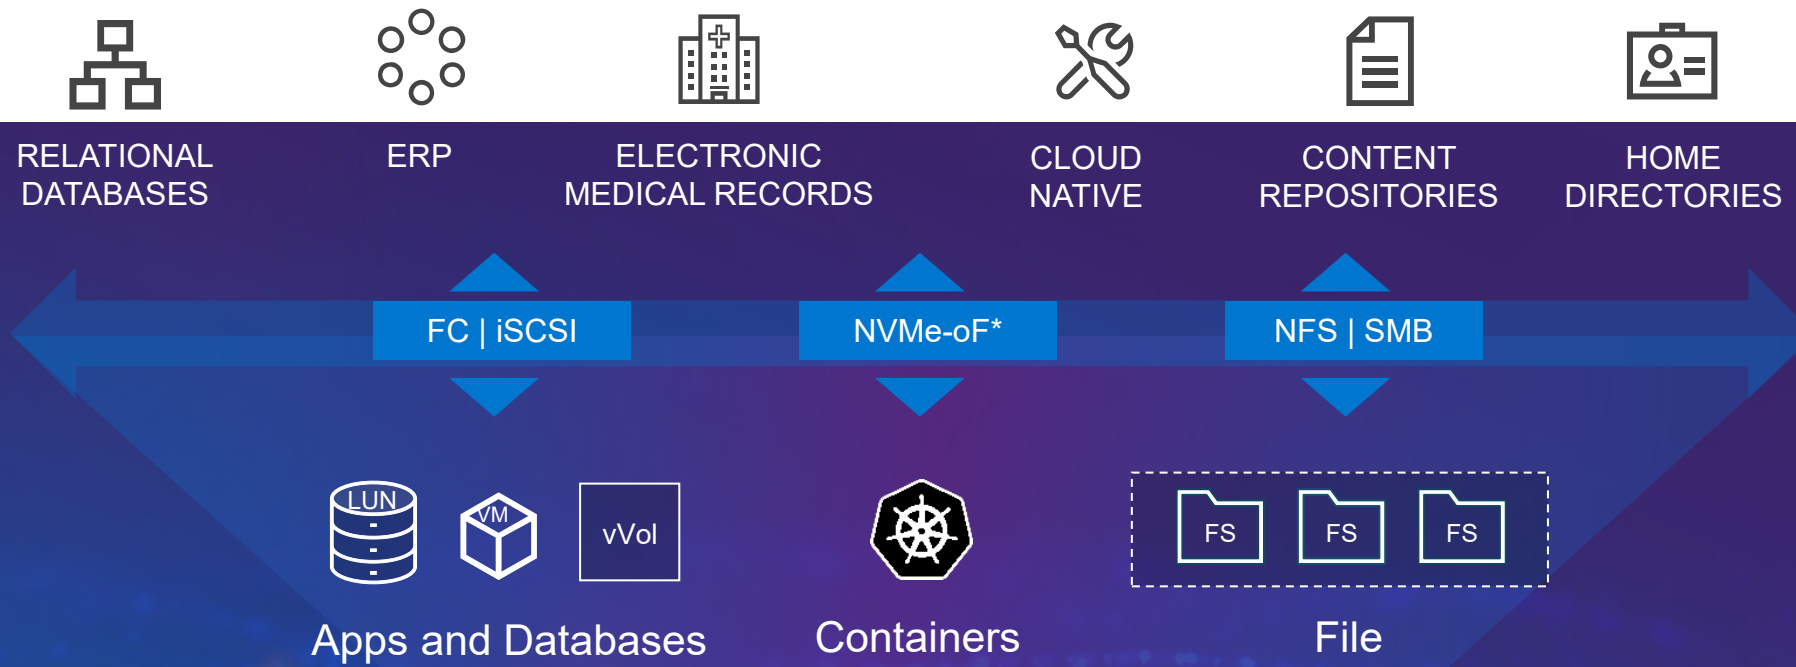

### Flexible Deployment

Modernize the core, edge, and cloud without disruption

# PowerStore – Any workload

## Traditional and modern workloads

# PowerStore – Adaptable architecture

Continuously modern without limits

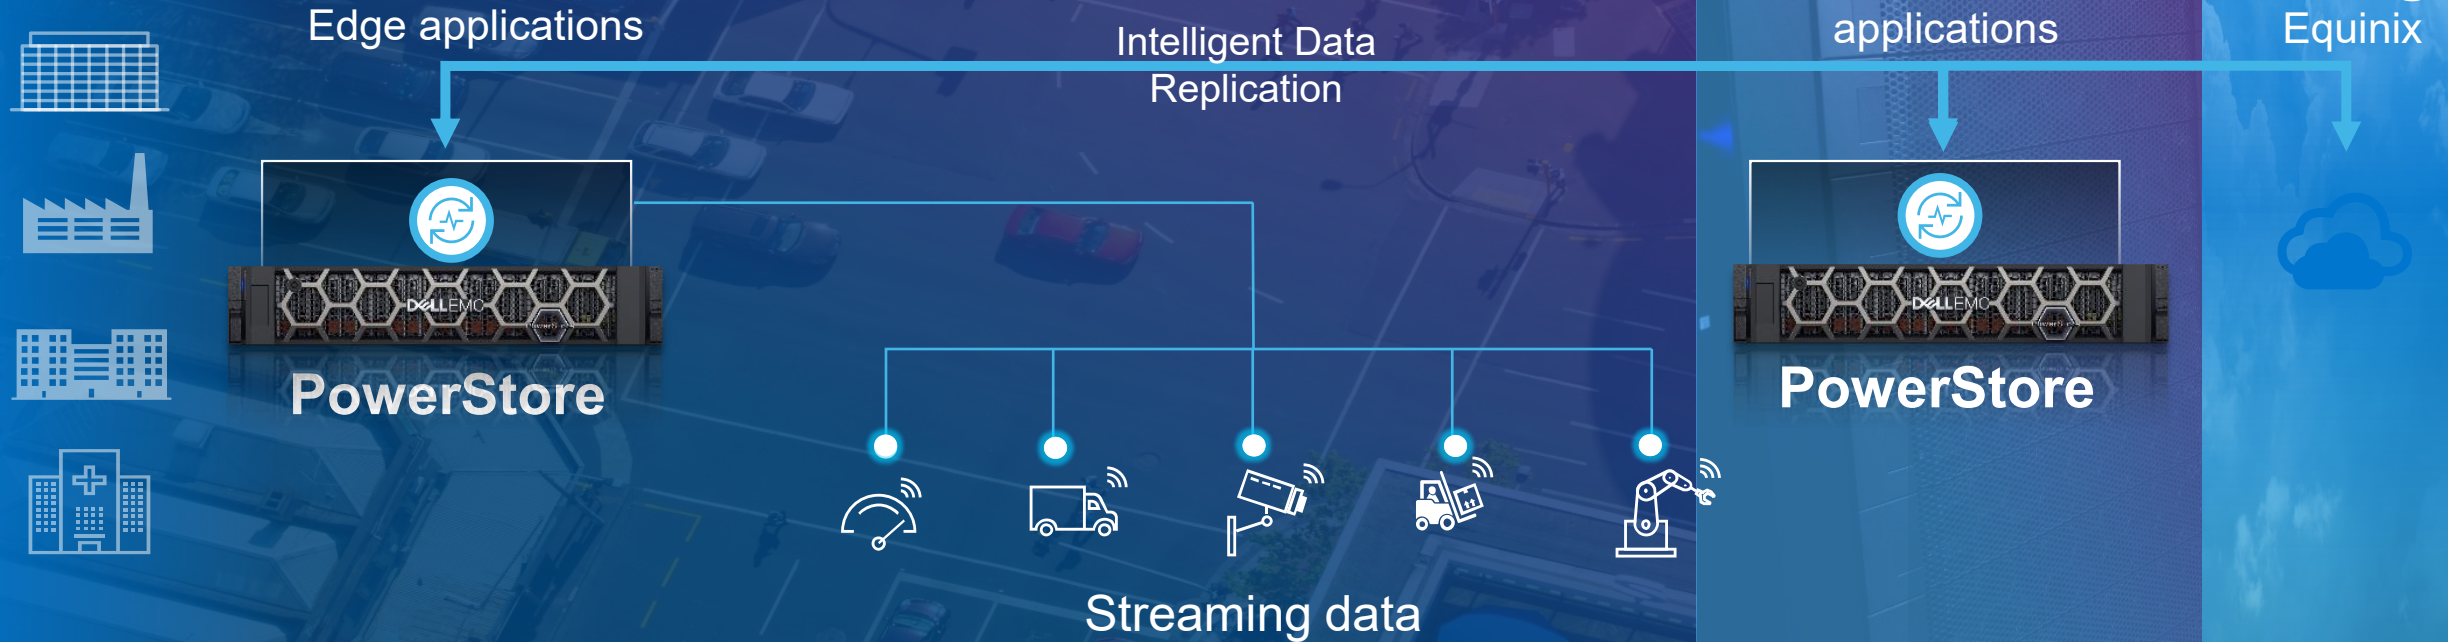

EDGE

# PowerStore

CORE

CLOUD

Small footprint,  
easy to deploy

Optimized for data  
retention and flexibility

Data can be replicated  
to core data center

# Intelligent data reduction

Enhanced services work proactively on your behalf

Intelligent dedupe  
+ compression

# 5:1

data reduction  
**GUARANTEED**

(no assessment required)

Always on | HW-assisted

Storage efficiency **without compromise**

Optimizes capacity  
*and* performance  
automatically

Up to 20% more IOPS  
during peak bursts

- ✓ No impact on data reduction ratios
- ✓ Fully automated – zero management effort required
- ✓ Larger **dynamic** dedupe cache results in higher DRR across nodes in the appliance
