

Onsite ITAD Services

We meet you where your assets are.

Onsite IT services built around your environment.

From data centers to corporate offices, Ingram Micro delivers secure onsite services that help enterprises manage refreshes, relocations, decommissions, and asset retirement with confidence.

Data center transitions.

Support for decommissioning, consolidation, equipment removal, cable extraction, palletization, transportation, and secure processing.

Device refresh programs.

End-to-end support for staging, imaging, deployment, installation, collection, and retirement of end-user devices.

Workplace relocations and closures.

Asset inventories, equipment removal, transportation, warehousing, and disposition services for office moves, consolidations, and closures.

Secure data destruction.

Onsite sanitization and destruction services performed within your environment to help reduce risk and maintain compliance requirements.

Why enterprises choose Ingram Micro.

- Global scale with local execution
- Certified technicians and project managers
- Flexible onsite and hybrid delivery models
- Audit-ready documentation
- Support for multi-site engagements
- Trusted by enterprise organizations worldwide

Backed by secure certified facilities and dedicated ITAD specialists around the globe, Ingram Micro supports enterprise organizations with standardized processes, high-volume operational capability, and consistent execution across locations.

Our Certifications:

Ingram Micro maintains compliance with strict data and environmental standards, including:

- e-Stewards 4.1
- ISO 9001, ISO 14001, ISO 27001, ISO 45001
- NAID AAA-certified data destruction
