

# DIZZION CLOUD DESKTOPS ON IBM CLOUD

## Dizzion | Redefining the way the world works

### AT A GLANCE

Dizzion provides native Horizon Enterprise capabilities as well as DEM, app volumes, CPA for hybrid delivery.

- Horizon powered Windows 10 desktops
- 2 options - DaaS & Managed DaaS
- Use Dizzion for Windows 10 & O365 licensing or bring your own
- Fully automate Horizon with the Dizzion C<sup>3</sup> platform
- Multi-tenant or dedicated SDDC's
- Span multiple SDDC's, scale-out architecture supports 1000's of users

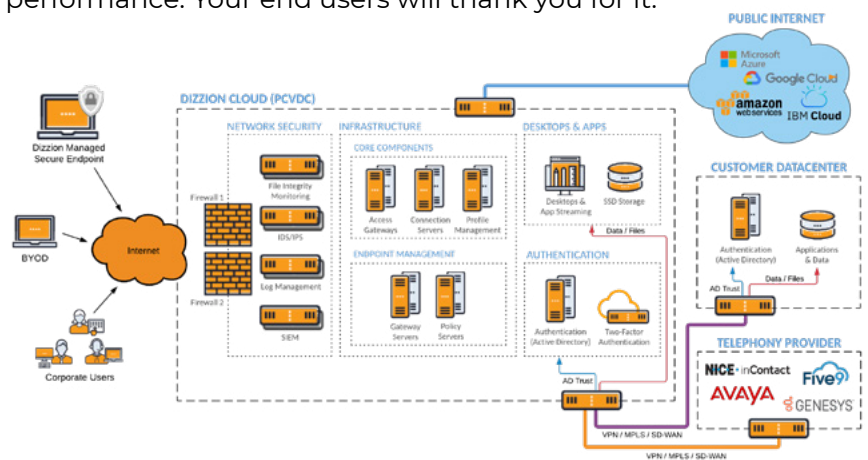

### KEY BENEFITS

- Automated deployment, architecture removes the headache & guess work of infrastructure planning
- Managed service provides desktops designed to perform at scale
- Secure & protect company data
- Real-time end-user analytics & monitoring via Dizzion's C<sup>3</sup> portal
- Scalable platform, all-inclusive price
- PCI-DSS, HIPAA and SOC-compliant desktops

Successful businesses are powered by happy, productive end users. The enterprise workforce drives maximum impact on their terms, working on any device from anywhere in the world. Give your team the freedom they demand while protecting systems, intellectual property and sensitive data. Since 2011, Dizzion has delivered workplaces without limits.

Today, digital transformation presents serious technical challenges - new limits - for organizations looking to adapt a cloud-first strategy. Integrating the latest desktop virtualization technology with your secure, compliant, hybrid cloud architecture is not easy. And, whether Horizon desktops are delivered on-premises or in the cloud, it is difficult to execute on your own. The process requires significant person hours, an assortment of tools, and a high risk tolerance.

Dizzion offers a better way. Choose the industry's first fully managed DaaS solution - simple to buy, simple to use, and simple to manage. Dizzion DaaS is purpose-built to ensure you are secure and protected without sacrificing desktop performance. Your end users will thank you for it.

### Dizzion DaaS solutions for scalability & DR

Quickly extend your internal VDI services to the cloud, adding desktops with on-demand resources as opposed to costly, time-consuming data center purchasing. This is ideal for burst scenarios, backup and disaster recovery, and bulk adds for mergers or acquisitions.

“Dizzion managed DaaS enables us to respond faster and more effectively to unpredictable business change. Their proven global performance means our steak experts are able to deliver the same best-in-class service, working from home.”

CIO, Omaha Steaks International, Inc.
