

Warehouse & Order Fulfillment Services

Secure inventory management.

Secure inventory management for today's enterprise.

Managing IT assets doesn't end when equipment is purchased—and it doesn't begin when devices are deployed.

Between procurement, deployment, redeployment, repair, and retirement, organizations often need a secure way to store, track, and distribute assets across locations.

Ingram Micro's **Warehouse & Order Fulfillment Services** provide enterprises with secure storage, inventory visibility, and on-demand fulfillment capabilities that help simplify lifecycle management while reducing operational burden on internal teams.

More than storage.

Visibility and control throughout the asset lifecycle.

- ✓ Securely store new and existing IT assets
- ✓ Track inventory across multiple locations
- ✓ Maintain visibility into available inventory
- ✓ Support deployment and redeployment initiatives
- ✓ Improve asset utilization
- ✓ Reduce storage constraints within corporate facilities
- ✓ Accelerate employee onboarding and equipment delivery

- Secure Asset Storage
- Inventory Management
- Order Fulfillment
- Deployment Support

We've got you covered.

Whether you're staging assets for future deployment, maintaining spare inventory, supporting employee onboarding, or managing equipment between lifecycle events, we help keep assets secure, organized, and ready when needed.

Questions? We've got answers.

Connect with the Ingram Micro ITAD team to learn how our services can help improve inventory visibility, streamline asset distribution, and support your broader IT lifecycle management strategy.

Warehouse and fulfillment capabilities.

Designed to support enterprise operations.

Secure Asset Storage	• New and used equipment storage • Serialized inventory tracking • Asset visibility and reporting • Controlled warehouse environments
Inventory Management	• Receiving and inventory intake • Asset tracking and reconciliation • Inventory reporting • Lifecycle status management
Order Fulfillment	• Pick, pack, and ship services • On-demand order fulfillment • Multi-site distribution • Employee device fulfillment • Replacement asset shipments
Deployment Support	• Asset staging • Redeployment coordination • Project-based fulfillment • Device refresh support

Integrated lifecycle support.

Warehouse and fulfillment services can be integrated with additional lifecycle services, including:

- **Depot Repair Services:** Keep assets productive and available for redeployment through repairs, refurbishment and inventory management.
- **Remote Asset Recovery:** Recover equipment from remote employees and distributed locations through the Ingram Micro Box program. Assets can be returned for storage, repair, redeployment, secure disposition or value recovery.

Why enterprises choose Ingram Micro.

Ingram Micro helps organizations maintain control of IT assets throughout the lifecycle—from procurement and deployment to storage, recovery, and retirement. Our warehousing and fulfillment services provide the flexibility, visibility, and operational support enterprises need to manage technology assets more efficiently.

- ✓ Nearly 400,000 square feet of owned warehouse capacity across U.S. facilities
- ✓ Secure inventory management and tracking
- ✓ Integration with broader ITAM and ITAD programs
- ✓ Scalable support for multi-location environments
- ✓ Single partner for storage, repair, deployment, recovery, and disposition
