

# Juniper AI On Us Customer Promotion

**Greater resiliency:** A modern microservices cloud matters. The cloud-native Juniper Mist platform scales elastically with your needs. With microservices, you get regular feature updates with no downtime. Network upgrades take minutes, not months.

**Complete visibility:** Proactive beats reactive every day. With AI, IT teams gain complete visibility over the network and can leverage AI-Native Networking capabilities to address Wi-Fi issues before they occur—reducing networking helpdesk tickets by up to 90%. That means better user *and* IT experiences.

**Increased frequency:** Stress-less, do more networks. Shrink to-do lists with self-driving operations, AI-guided actions, and a 100% open API that integrates seamlessly with diverse solutions. Mist wireless enables you to reduce networking OpEx by up to 85%—freeing up time, money, and resources for more strategic projects.

Named Furthest in Vision, Highest in Execution. [2024 Gartner® Magic Quadrant™ for Enterprise Wired and Wireless LAN Infrastructure](#)
