

Microsoft Purview Enablement

Engagement Scope

Designed as a fixed-scope offering, this engagement provides a streamlined implementation of **Microsoft Purview** to establish foundational data protection, compliance visibility, and information governance controls for **up to 300 users**. It is focused on deploying core Purview capabilities aligned with Microsoft best practices, enabling the customer to begin classifying, protecting, and monitoring sensitive data across Microsoft 365 workloads.

Timeline

Approximately
4 weeks

Project Initiation & Discovery

1. Project Kickoff Meeting
2. Confirm licensing, tenant readiness and prerequisites
3. Review of customer compliance goals and regulatory drivers (High-Level)
4. Define implementation boundaries and success criteria

Purview Configuration & Enablement

1. Microsoft Purview Setup
2. Information Projection
3. Data Loss Prevention (DLP)
4. Compliance Foundations

Validation & Knowledge

1. Validate label visibility and DLP policy behavior
2. Perform administrative walkthrough of configured settings
3. Provide operational guidance for ongoing management

Deliverables

Microsoft Purview enabled and configured

Sensitivity labels and label policies deployed

DLP policies configured and validated

Administrative configuration summary

Knowledge transfer session (live or recorded)

Project Close-out documentation

Why Ingram Micro?

Ingram Micro's partnership with Microsoft is supported by top-tier certifications, extensive marketplace capabilities, and comprehensive support services. This positions us as a trusted partner for channel providers and end customers looking to fully leverage cloud solutions.

Microsoft Authorized Distributor

As an official distributor for Microsoft, Ingram Micro enables partners to easily access, deploy, and support Microsoft solutions, complete with localized billing and dedicated technical expertise.

Microsoft Solutions Partner Designations

Ingram Micro has earned Microsoft Solutions Partner status across critical Microsoft domains, highlighting our proven technical capabilities and consistent customer success.

Specialized training and certification programs

We offer extensive training, certification support, and enablement resources, empowering partners to rapidly build and scale their practices.

Advanced specializations

Ingram Micro holds two Azure Advanced Specializations. Achieving and maintaining these specializations validates our deep technical expertise and unlocks significant financial

Comprehensive partner benefits

Ingram Micro provides partners with robust pre-sales enablement, professional services, practice-building guidance, exclusive services, promotions, lifecycle support, and direct engagement with technical experts.

Simplify Purview Enablement

Ingram Micro helps you guide customers through every step of their security journey—from assessment to optimization. Our fully managed, Microsoft-funded engagements remove the complexity of enablement so you can focus on delivering results.
