

# Ensure zero-trust protection for regulated and sovereign workloads

Data security, privacy and sovereignty regulations across the globe are increasing requirements for how data is processed and protected.

In the complex world of the cloud, governments and regulated industries expect companies and service providers to protect and process data in accordance with regulations and industry requirements.

## How Ingram Micro can help

With Ingram Micro at your side, you can position yourself as the strategic partner to deliver end-to-end zero trust data solutions.

## Integrating AWS cloud solutions into your practice

With technology solutions and professional services offered by Ingram Micro, you can help customers leverage AWS to build zero trust environments, enhance cybersecurity, implement AI and much more.

### Modernize the citizen experience

- Help agencies take advantage of the latest technology to modernize and improve online identity verification
- Assist government agencies in overcoming digital identity proofing roadblocks.
- Help agencies pursue modern digital identity solutions.

IT administrators in both the public and private sectors need security, confidentiality and compliance—Ingram Micro and AWS cloud make it possible to build secure, high-performance, resilient and efficient infrastructure.

### Controls, auditing and security accreditations enable compliance with

- FedRAMP
- Criminal Justice Information Services (CJIS)
- Health Insurance Portability and Accountability Act (HIPAA)
- HITRUST
- CMMC 2.0

**Ready to gain access to the latest solutions, tools and resources you need to get ahead in the as-a-service economy?**
