

LENOVO EXPRESS: THE EASIEST PATH TO THE QUICKEST DELIVERY ON AVAILABLE SERVERS

Do you have a customer who needs a new server rack—stat? Instead of disappointing them with a long lead time, delight them with Lenovo Express. The Express offering was designed to meet the needs of customers who have immediate delivery needs and are flexible with the options used within their servers.

Unlike non-Express orders, which are analyzed, procured and prioritized before shipping, Lenovo Express orders drop immediately to the factory for delivery. This quick-ship offering is applicable to eight mainstream Lenovo racks with order-to-ship delivery currently under eight days.

Express is integrated in the online public Data Center Solution Configurator (DCSC), where you can create configurations for ThinkSystem and ThinkAgile solutions. We've also added new functionality to allow users to always start in Express mode, increasing the chance your order will ship fast. The DCSC also allows you to see which configuration tradeoffs are required to keep your Express status, and you can seamlessly transition from Express to the regular configuration-to-order (CTO) model, called 'Full Mode.'

Which products/options are in Express?

All mainstream Intel- and AMD-based Lenovo rack servers are in Express, including:

- SR630
- SR630 V2
- SR650
- SR650 V2
- SR635
- SR645
- SR655
- SR665

Start a Configuration

Choose how you'd like to get started building a Configuration.

- Start with a **Express**
- Start with a **Preconfigured Model**
- Start with a **Configure to Order**
- Pick-up where you left off **Import a Configuration**
- Download or launch a **Deployment Ready Solution**

Customize in Express Mode

In this mode, the configurator will show a subset of all Configure To Order selections that can be manufactured and shipped quickly from Lenovo. If you need components or models that are not available in this mode, please select the full CTO mode.

* Machine Type Model:

7X06CTO1WW—ThinkSystem SR650 – 3yr Warranty
