

Discover the power of partnerships.

Verizon collaborates with partners to offer the solutions you need today — and tomorrow.

To bring the digital world to life, you'll need the right partners that can deliver the solutions that matter most. At Verizon, we can help you do it all — simply, securely and reliably.

We offer proven and innovative IoT, cloud, mobility and security solutions. And we deliver it all on the network America relies on, offering you the connectivity and coverage you need for your business.

To provide you with complete solutions that meet your unique requirements, Verizon works with technology solution providers — experts in network, security, One Talk, mobility device management and more.

Our technology partners bring a wealth of benefits to your business:

- Partners specialize in creating and deploying custom vertical solutions, giving your business what it really needs to grow, remain competitive and stay productive
- Partners have established strong OEM relationships and offer an extensive portfolio of devices, software and tools
- Partners provide all types of professional services such as deployment and post-sale services for ongoing support

Together, Verizon and our partners offer you a powerful team that can create strategic solutions for your business.
